# WELCOME TO THE FUTURE: Selexis SUREscan®

## POWERFUL SERVICE ENSURING MASTER CELL BANK INTEGRITY & QUALITY

High quality master cell banks (MCBs) are mission critical for biologic manufacturing campaigns as well as IND and BLA filings. Full genomic analysis is key to validate MCB integrity, clonality and stability. Selexis SUREscan® is a comprehensive service that provides unparalleled genomic data packages for RCB validation and other potential genomic alterations. Selexis SUREscan™ allows for better-informed decision making and for reduced regulatory and manufacturing risks.
